

# Year 2 - Plants

## Key Facts

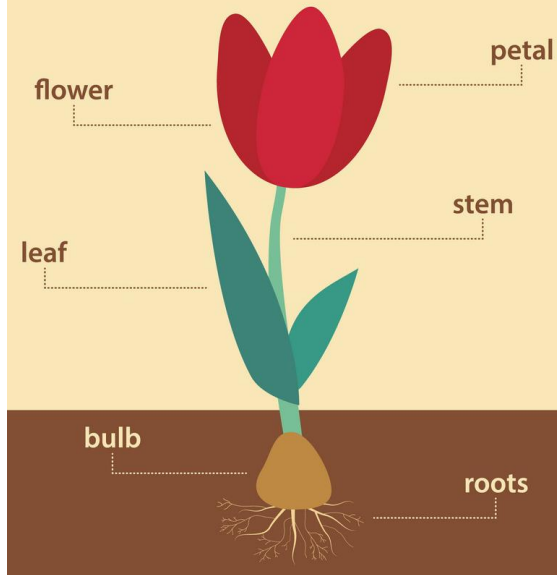

### To grow well plants need:

<b>Sunlight</b>	All plants need light from the sun to grow healthily.
<b>Water</b>	All plants need water to grow. Without water, seeds and bulbs wont germinate.
<b>Temperature</b>	Some plants like it cooler and some like it warmer.
<b>Nutrition</b>	Plants make their own food in their leaves using sunlight.

## Plant Life Cycle

## PLANT TULIP

Some bulbs are edible like garlic, onions and leeks.

## Key Vocabulary

<b>adapt</b>	Changing slightly to help an animal or plant survive where it lives.
<b>bulb</b>	A round ball that stores food to help a new plant grow.
<b>extinction</b>	An animal or plant species that has completely died out.
<b>germinate</b>	When the seed or bulb soaks up water and begins to grow.
<b>habitat</b>	The natural home of an animal or plant.
<b>mature plant</b>	A full grown plant that has leaves, roots, stems, flowers, fruits and seeds.
<b>seed dispersal</b>	When the seeds move away from the parent plant.
<b>shoot</b>	The shoot grows upwards from the seed or plant to find the sun.
<b>sprout</b>	When a plant sprouts it grows a new shoot.
<b>temperature</b>	How warm or cold something or somewhere is.
